

APPLICATION PROCEDURE

HYBRID CERAMIC SPRAY

ONYX
COATING
Every Day Like Brand New

☰ PROPERTIES

1. Professional nano-ceramic technology
2. Refresh paint color and enhanced gloss
3. Long-lasting up to 12 months
4. Easy on, easy off
5. Water repellent prevents watermarks
6. Mirror glass and streak-free finish
7. Improves paint gloss and slickness
8. The best durable ceramic spray on the market
9. Works great on all surfaces (glass, ppf, gel coat, clear coat, metal, plastic, and rubber)
10. Spray on and wipe off
11. Can be used as a maintenance product for sealant and ceramic coating

👉 APPLICATION

1. Ensure paint is clean and dry before applying product.
2. If desired, correct your car's paint before applying, it is not necessary for the product to fully penetrate into the paint.
3. Spray onto a microfibre or foam/microfibre applicator, it can also be directed applied onto surfaces.
4. Apply to the surface using a crisscross pattern to ensure complete coverage.
5. After application, allow product to cure and haze white. Then buff off with a clean, dry using an Onyx Coating microfibre towel.
6. After buffing, no cure time is needed before being introduced to water.
7. Avoid working in direct sunlight or on hot surfaces.
